SUMMARY

IT / DevOps professional with 10+ years of experience in technology, business systems, data management, operational support and process automation, with growing specialization in financial systems and accounts-support workflows.

Currently leading the development and implementation of Rent Reconciliation and POS systems for 2025/26, combining technology with practical financial operations including payment reconciliation, transaction management, cashbook preparation, bank reconciliation, invoicing, ledgers, VAT returns, payroll and financial reporting.

Experienced in integrating payment systems using the Equity Bank Biller API, real-time IPN (Instant Payment Notification) processing and Excel-based financial workflows to improve payment visibility, reconciliation and reporting.

Advanced user of Microsoft Excel and Google Sheets, with strong experience in data validation, database management, reporting, transaction records and quality control. Demonstrated 99.9% accuracy in large-scale data-entry projects.

Highly analytical, detail-oriented, reliable and comfortable working with financial and operational data while maintaining accuracy, confidentiality and data integrity.

EXPERIENCE

DEVOPS AWARE & IT SUPPORT SPECIALIST

2014 – Present

Managed Service Provider

Financial & Business Systems; Data Management & Excel; Business Operations

- Develop and support business systems that manage operational and financial information.

- Work with payment, transaction, customer, tenant and business records.
- Design automated workflows to improve accuracy and reduce manual reconciliation.
- Support reporting and data analysis for operational decision-making.
- Maintain accurate digital records and structured databases.
- Apply data validation and quality-control procedures to business information.
- Perform large-scale data entry and data validation with a documented 99.9% accuracy rate.
- Process information from multiple sources and validate records before database entry.
- Use Microsoft Excel and Google Sheets for data organization, analysis and reporting.
- Generate operational reports and dashboards.
- Maintain data integrity across multiple systems.
- Create and maintain structured documentation and procedures.
- Support business process automation and operational efficiency initiatives.
- Participate in budget-management activities.
- Maintain detailed operational records and documentation.
- Support users and clients with business systems and applications.
- Develop Standard Operating Procedures and process documentation.
- Coordinate with teams and clients to understand business requirements.
- Provide training and ongoing operational support.

PROJECTS

Rent Reconciliation & Payment Management | 2025/26 – Current

- Equity Biller API
- IPN
- Payment Tracking
- Reconciliation
- Excel
- Reporting

Financial & Business POS | 2025/26 – Current

- Cashbooks
- Bank Reconciliation
- Invoices
- Ledgers
- VAT
- Payroll
- Financial Statements
- POS

2024 Census Project

- Offline Data Capture
- Data Validation
- Analytics
- Dashboard

2025 Online Calendar

- Dashboard
- Analytics
- Reports

USSD-Based Guard Monitoring System

FEATURED FINANCIAL SYSTEMS PROJECTS

01 | RENT RECONCILIATION & PAYMENT MANAGEMENT SYSTEM 2025/26 – Current Financial Reconciliation | Equity Biller API | IPN | Excel | Payment Tracking | Reporting Currently developing and supporting a rent reconciliation platform designed to automate and improve the management of rental payment records and reconciliation.

Key responsibilities & capabilities: - Integrating the Equity Bank Biller API for payment collection and transaction processing. - Implementing IPN (Instant Payment Notification) workflows for real-time payment-status updates. - Connecting payment events to tenant, room and rent records. - Automating the flow from payment notification → transaction verification → reconciliation → account/status update. - Reconciling received payments against expected rent obligations. - Identifying payment discrepancies, exceptions and outstanding balances. - Maintaining structured tenant, rent and payment records. - Supporting Excel-based financial data processing and reporting. - Developing dashboards for monitoring payment status and rent collection. - Maintaining transaction histories for audit and reporting purposes. - Supporting accurate and timely financial information for management decision-making.

Financial Operations Covered: Rent Collection → Payment Processing → IPN → Reconciliation → Outstanding Balances → Reporting

02 | FINANCIAL & BUSINESS POS SYSTEM 2025/26 – Current POS | Cashbooks | Bank Reconciliation | Invoicing | Ledgers | VAT | Payroll | Financial Statements Currently developing a POS and business financial-management system designed to extend beyond sales processing into core accounting and financial reporting workflows.

Planned / supported financial capabilities: - Cashbook preparation - Bank reconciliation - Invoice generation and management - General ledger management - Transaction recording - Sales and purchase records - VAT return preparation - Payroll processing - Financial statements - Customer account records - Supplier records - Inventory and stock movement records - Payment tracking - Sales reporting - Financial dashboards

System & Data Responsibilities: - Design transaction workflows for accurate recording of business activities. - Maintain structured customer, product, sales and payment records. - Connect sales transactions with inventory and financial records. - Support automated transaction reporting. - Implement data validation and integrity controls. - Design workflows for reconciliation and exception handling. - Support offline-first transaction processing and synchronization. - Maintain reliable digital records for financial reporting.

Financial Flow: Sales → Payment → Inventory → Cashbook → Ledger → Reconciliation → VAT / Payroll → Financial Statements

PROFESSIONAL STRENGTHS

- Strong numerical and analytical ability - Excellent attention to detail - High level of accuracy - Financial data awareness - Reconciliation mindset - Strong Excel skills - Problem solving - Data integrity and quality control - Confidentiality - Reliability and accountability - Professional communication - Time management - Ability to work independently - Team collaboration - Willingness to learn
