📍 Nairobi, Kenya

PROFESSIONAL SUMMARY

Results-driven IT Professional with **10+ years of hands-on experience (2014 – Present)** in business systems support, data management, operational reliability, and IT infrastructure automation. Combines deep systems troubleshooting capabilities with modern cloud and application engineering expertise. AWS Certified Cloud Practitioner (Gold Class, 2024) holding a Diploma in Information Technology from the Government Training Institute (G.T.I.) Embu.

Demonstrated track record designing and deploying enterprise-grade business applications, including the live **Jimwas Enterprises POS** (React, Supabase PostgreSQL, M-Pesa Daraja, KCB Buni) and real-time bank reconciliation workflows (Equity Bank Biller API & IPN). Seeking the **IT Officer** role at Communications Online to ensure rock-solid network availability, data security, workstation and server integrity, and proactive user support.

CORE TECHNICAL COMPETENCIES

Domain	Key Skills & Technologies
Systems & Infrastructure Support	Windows Server & Linux Administration, Workstation Configuration, User Helpdesk Support, Standard Operating Procedures (SOPs), Hardware & Peripherals, Disaster Recovery Runbooks
Networking & Cloud	AWS Cloud Practitioner (EC2, VPC, S3, IAM, CloudWatch), Subnetting, Security Groups, Route Tables, DNS, TCP/IP, VPN Fundamentals, Vercel CI/CD

Databases & Data Integrity	Supabase (PostgreSQL), MySQL, Microsoft Access, Row Level Security (RLS), Schema Design, Indexing, Data Validation & Quality Control (99.9% accuracy record)
Financial & Payment Systems	M-Pesa Daraja STK Push API, KCB Buni Gateway, Equity Bank Biller API, Instant Payment Notification (IPN) Webhooks, Automated Cashbook & Bank Reconciliation
Application & Scripting	React, TypeScript, JavaScript, Python, Node.js, RESTful APIs, Git / GitHub, Offline-First PWA (IndexedDB Sync)
Productivity & Reporting Tools	Advanced Microsoft Excel / Google Sheets (Formulas, Pivot Tables, Macro automation), Power BI, SharePoint, Google Workspace, Microsoft Teams

---

PROFESSIONAL EXPERIENCE

DEVOPS AWARE & IT SUPPORT SPECIALIST

Managed Service Provider — Nairobi, Kenya | *2014 – Present (10+ Years)*

- Administer and maintain business-critical IT systems, endpoints, and digital workflows across multiple client operations.
- Provide tier-1/tier-2 hardware, software, and network troubleshooting for workstations, local network equipment, and peripheral devices.
- Maintain data integrity, backups, and structured digital records across SQL databases and cloud platforms, achieving a documented 99.9% data validation accuracy rate.
- Author Standard Operating Procedures (SOPs), incident root cause analyses, and operational deployment checklists to streamline support workflows.
- Design automated data pipelines and financial reporting workflows (Excel, Google Sheets, Power BI) reducing manual reconciliation time by over 60%.
- Train end-users and client teams on software tools, cybersecurity best practices, and secure data handling procedures.

FEATURED PROJECTS & TECHNICAL EVIDENCE

1. Jimwas Enterprises POS & Inventory Platform (2025/26 – Current)

Role: Lead Architect & Developer | **Live App:** jimwas-yn.vercel.app | **Repo:** github.com/CharlesMbillo/jimwas

- Engineered a full-featured retail Point of Sale system supporting 4 user access tiers (Admin, Manager, Cashier, Supervisor) with role-based void workflows.
- Built a PostgreSQL schema on Supabase with 13+ relational tables, protected by granular Row Level Security (RLS) policies.
- Integrated M-Pesa Daraja STK Push with real-time transaction state tracking, CSV reconciliation exports, and automated audit trails.
- Built offline-first transaction persistence using browser IndexedDB with automatic cloud synchronisation upon network restoration.
- Conducted an architecture security review identifying client-side credential exposure risks (`VITE_` variables) and formulated backend Edge Function migration runbooks.

2. Rent Reconciliation & Payment Automation System (2025/26 – Current)

- Integrated Equity Bank Biller API and Instant Payment Notification (IPN) webhooks for real-time payment capture and account status updates.
- Automated end-to-end payment flows: Payment Notification → Transaction Verification → Ledger Reconciliation → Account Balance Update.
- Eliminated payment discrepancies through automated exception flagging and digital audit trail generation.

3. Census & Field Data Capture Platform (2024)

- Designed an offline data capture and validation architecture ensuring reliable field data collection and zero record loss prior to central database synchronisation.

EDUCATION & CERTIFICATIONS

Formal Education

- **Diploma in Information Technology** — Government Training Institute (G.T.I.), Embu (2008)

- **Kenya Certificate of Secondary Education (KCSE)** — Parklands Secondary School

Professional Certifications & Specialized Training

- **AWS re/Start — Certified Cloud Practitioner (Gold Class)** — Amazon Web Services / Ajira eMobilis (2024)
- **Web Development Professional Certification** — PLP Academy (2023)
- **Database Management, Data Validation & Quality Control** — Ajira Digital Program (2022)
- **Virtual Assistant & Digital Operations Certification** — Ajira Digital Program (2022)

ALIGNMENT TO IT OFFICER REQUIREMENTS (COMMUNICATIONS ONLINE)

Requirement	Charles Mbillo’ s Documented Competency
LAN / WAN / Network Maintenance	Practical AWS VPC design (subnets, route tables, security groups) and 10+ years on-premise MSP network support
Server & Workstation Administration	Linux & Windows administration, EC2 provisioning, endpoint troubleshooting, automated patch management
Data Integrity & Security	PostgreSQL RLS policies, RBAC access control, IAM least privilege, verified 99.9% data validation record
Backup & Disaster Recovery	Automated cloud backups, S3 versioning, disaster recovery runbooks with documented RPO/RTO metrics
Systems & Payment Integration	Hands-on production integrations with M-Pesa Daraja, KCB Buni, and Equity Bank Biller APIs
User Support & SOP Documentation	10+ years resolving multi-user technical support incidents, creating standard operating runbooks
